STREAK FREE

Machine Dishwashing Powder with Built-In Rinse Additive

Streak-free machine dishwashing powder is an oxygen activated detergent powder containing sanitising and anti-bacterial properties for commercial and domestic-style dishwashers.

Procedure:

Washing:

1. Wash or scrape surplus waste food from plates.
2. If required, PRE-SOAK cutlery and stained cups or crockery.
3. Stack dishes carefully and correctly into racks.
4. Be sure scrap trays are properly positioned in wash tank.
5. Place racked dishes into machine.
6. Initially fill machine wash tank with fresh water. After each fill add 100-120 grams of STREAK FREE to achieve basic dosing strength. Add a further 30-60 grams of STREAK FREE at the beginning of each wash cycle.
7. Allow dishes to dry thoroughly in racks before stacking.
8. Start and operate dishwasher according to manufacturers directions.
9. When washing and rinsing is complete, allow dishes to dry completely before removing from racks.

Dishwashing Maintenance:

1. Empty water in wash tanks.
2. Clean interior of wash tank with brush and small amount of Rapid Sink Washing detergent.
3. Rinse the tank with clean water.
4. Remove curtains (if fitted) and scrub with brush and Rapid Sink Washing detergent.
5. Remove wash arms and remove debris from jets.
6. Reassemble.
7. Refill wash tank.
