

Rapid Group receives certification for quality assurance

The Rapid Group has been certified for quality assurance (QA) in quality management; safety and occupational health and safety.

Rapid Group general manager Bruce Lees said the QA provides Rapid Group with a new level of credibility.

“We undertook this process because we are now trading with government departments, large BSC’s and corporate clients. The QA provides us with a level of credibility,” said Lees.

“With 50 stores across Australia, we believe that RapidClean is perfectly positioned to look after clients of all sizes. Our stores are all independently-owned, so the people in the store have ‘skin in the game’, which leads to much higher service levels than our multinational competitors.”

The Rapid Group has also introduced a free support platform for its customers who use RapidClean products.

“We have thousands of customers using RapidClean cleaning products throughout Australia and we want to make that as safe as possible,” said Lees.

“To assist with that goal, we have built an online safe chemical handling course which can be accessed through the training page on our website.”

The course is designed to inform on the legislation and procedures required to safely handle chemicals in the workplace.

Top manufacturer recommends SEBO vacuum cleaners

Heckmondwike FB recommends SEBO vacuum cleaners be used to achieve better performance and a longer life expectancy from carpets.

“To maximise Supacord’s aesthetic appeal, performance and life expectancy, it is important to vacuum every day with a twin-motored upright vacuum cleaner,” said Heckmondwike FB marketing manager, Abby Chandler.

“If left to build up, the particles of dirt are much harder to remove and can damage the fibre structure and decrease the life of the carpet. We recommend SEBO commercial vacuum cleaners as they have the power and performance to clean carpets like Supacord effectively.”

SEBO’s Comfort range of commercial upright vacuum cleaners has a flat-to-floor design and telescopic tube system that provides all round cleaning versatility.

“The 370 and 470 Comfort twin motor uprights are cost efficient and economical to maintain,” said a SEBO spokesperson.

“They incorporate changeable brush strips, low cost bags and filters, modular construction and readily available parts.”
